

[Board Approved: 11-Jul-2023] Water Accounting at the Sub-APN Level

While the Assessor's Parcel Number (APN) typically constitutes the smallest unit of land for which the allocation is monitored (see §2.1), a grower retains the right to request the division of an APN into multiple smaller sub-APN units for tracking purposes. The cumulative area of all sub-APN units shall be equivalent to the assessed acreage of the original APN. It is permissible for multiple different renters to manage various sub-APN parcels; however, any credits associated with these sub-APN units shall remain the property of the landowner. The formation or dissolution of Sub-APNs shall be authorized at the commencement of each water year (October 1st).
