Mid-Kaweah Board,

The California Water Service Company (Cal Water) appreciates the opportunity to comment on the Draft Mid-Kaweah Groundwater Sustainability Plan (Mid-Kaweah GSP). Cal Water serves over 2 million customers throughout the State of California and is the primary water provider for the approximately 140,000 urban customers in the City of Visalia and surrounding areas. We commend all the parties for their efforts to develop a groundwater sustainability plan that ensures the proper management of the groundwater resources of the basin.

As noted in the draft GSP, there are a number of significant management actions to be undertaken by the affected parties in the coming years to implement the plan. In particular, the development of the pumping allocation program, refinement of the Water Accounting Framework, and the cost allocation process for basin-wide management and project implementation activities will require significant coordination among and input from the impacted parties. Cal Water looks forward to being a direct participant in the management of the GSA as we ensure the sustainable management of the Kaweah Subbasin.
